

CALL FOR APPLICATION

Young researcher in AI-Enhanced Ultrasound for Comprehensive Diagnostic & Therapeutic Applications

Projet	AI-Enhanced Ultrasound for Comprehensive Diagnostic & Therapeutic Applications
Duration	12 months, full time
Allowance	One €20,000 scholarship
Location	IRCAD France 1, place de l'hôpital 67000 Strasbourg France

The Institut de Recherche Contre les Cancers de l'Appareil Digestif (IRCAD) in France invites applications for a position as a motivated young resident researcher.

Project description

This innovative project aims to integrate artificial intelligence with ultrasound to improve diagnostic and therapeutic quality in interventional gastroenterology. The selected researcher will work closely with a multidisciplinary team of experts to develop and test this new technology.

Selection criteria

Medical degree.
Demonstrated interest in clinical research and innovation.
Good command of French and English.

Responsibilities

Actively participate in the research, development and implementation of the project.
Work closely with research, engineering and clinical teams.
Contribute to the writing of scientific articles, reports and presentations.
Monitor technological and scientific developments in the field.

Benefits

Access to cutting-edge technology and a first-class research environment.
Ongoing training in interventional gastroenterology and related technologies.
Opportunity to publish in renowned journals.
Networking with internationally renowned experts.

To apply, please send your detailed CV, covering letter and two letters of recommendation to job@ircad.fr by **October 31, 2023**.

If you have any questions about this opportunity, please do not hesitate to contact Dr. Antonello Forgione at Antonello.forgione@ircad.fr.

Join us on this exciting adventure and help shape the future of interventional gastroenterology!
