

THE BEST TRAINING CENTER IN THE WORLD

8,500 SURGEONS TRAINED EACH YEAR (ONLINE & ON-SITE)

FULL IMMERSION IN UROLOGIC SURGERY

Over the last few years, the minimally invasive approach has gradually superseded the conventional open approach in several urologic surgery indications. Thanks to the quality of operative vision provided by high-definition 2D or 3D cameras and the precision of laparoscopic surgery maneuvers, this minimally invasive approach has allowed for the improvement of the quality and accuracy of interventions and ensured their safety, particularly for cancer treatment. Surgical progress in conventional laparoscopy has gradually taken off and led to enhanced precision surgery. The development of robotic assistance has further increased the level of quality and precision in this surgery, thanks to 3D vision, the elimination of any limits in mobility during the operative gesture, and the comfort provided to the

operating surgeon. All urologic procedures utilizing these laparoscopic or robot-assisted techniques are part of IRCAD training programs in urologic surgery. Intensive courses will consist of theoretical sessions conducted by world-renowned experts, as well as hands-on sessions in the experimental lab using these laparoscopic and robotic technologies. Considering the development of robotic surgery, IRCAD urology offers a dedicated robotic course that includes theoretical sessions, live broadcasts, and training workshops on anatomical specimens using surgical robotic systems. Additionally, urology courses are organized in other areas of minimally invasive surgery (endo-urology) and new technologies for BPH surgery (such as laser and waterjet, for instance). **Join us for a course!**

COURSE CANCELLATION POLICY

Should you wish to cancel or postpone your registration, please notify us by email at: cancellation@ircad.fr. For the hotel cancellation policy, please check page 24.
