COURSE OBJECTIVES

- Recognize potential complications that may arise during gynecological laparoscopy.
- Develop strategies for effectively managing surgical complications in real-time.
- Enhance understanding of preventive measures to minimize the occurrence of complications.
- Acquire proficiency in troubleshooting techniques to address unforeseen challenges during procedures.
- Foster confidence in handling complex scenarios through practical simulations and case studies.
- Explore advanced strategies for optimizing patient outcomes and minimizing postoperative complications.
- Collaborate with peers to share experiences, best practices, and innovative approaches in complication management.
- Gain insights into emerging technologies and advancements in gynecological laparoscopy to enhance surgical safety and efficacy.

EDUCATIONAL METHODS

- Intensive practical training on live tissue (mini-pigs) and pelvic trainers
- Interactive theoretical and video sessions between Faculty and course participants
