THE BEST TRAINING CENTER IN THE WORLD

8,500 SURGEONS TRAINED EACH YEAR (ONLINE & ON-SITE)

FULL IMMERSION IN ARTHROSCOPIC & ULTRASOUND SURGERY

The wrist is the most complex articular system in the human body, involving 8 carpal bones, 5 metacarpals, and 2 forearm bones, which together form 11 different joints. This intricate arrangement enables unparalleled complexity of movement. Numerous intrinsic and extrinsic ligaments connect these bones and joints.

For a long time, the extensive number of post-traumatic or degenerative pathologies was treated insufficiently, with unsuitable or inappropriate techniques.

Over the past 20 years, wrist arthroscopy has become an essential tool to understand, analyze, and treat its related pathologies. Our constantly updated courses teach the basics of this specialty as well as the latest therapeutic modalities.

Ultrasound-guided surgery is an emerging technique that has been advancing over the past few years. The basic course is designed for surgeons interested in hand, wrist, and elbow surgery.

COURSE CANCELLATION POLICY

Should you wish to cancel or postpone your registration, please notify us by email at: cancellation@ircad.fr. For the hotel cancellation policy, please check page 24.

Please note that no refund or postponement will be considered for any cancellation received less than 6 weeks before the course starts, even if Visa application has been denied.
